

PRESS RELEASE

TALLINN, Estonia / OFFENBURG, Germany, 28.04.2011 - for immediate release

Elvior and Verifysoft Technology announce Reselling Agreement

Elvior Ltd., one of the leading TTCN-3 test tools vendors, and Verifysoft Technology, one of the leading software distribution companies for software testing and analysis tools in Europe, announced a reselling agreement for Germany, Austria, Switzerland, Liechtenstein, France, Belgium, The Netherlands and Luxemburg.

Verifysoft Technology will distribute Elvior's flagship tool Elvior TestCast. Elvior TestCast is a TTCN-3 test development and execution platform which includes TTCN-3 editor, TTCN-3 compiler and TTCN-3 executive. TestCast is a full-featured test tool to develop TTCN-3 scripted tests either generating them automatically from models or writing manually. TestCast compiles and executes TTCN-3 tests, and provides means to analyse the test runs. It is a single comprehensive test platform for professional TTCN-3 testers. TestCast is ideal for testing software or hardware components in a wide range of industry sectors. The tool can be used as a stand-alone tool. It works also seamlessly together with the Conformiq Tool Suite, an automatic test case generator which is also distributed by Verifysoft Technology.

"We are constantly providing best of class service and test automation solutions to our customers and partners. To strengthen our market position in central Europe and further, in automotive industry, it was a reasonable decision to sign the Agreement with such well-positioned company as Verifysoft Technology. We expect to see sound growth in TTCN-3 testing solutions market within next couple of years", says Erki Lipre, CEO of Elvior.

"We are always interested in enlarging our portfolio with best-in-class software products to strengthen our and our partners' market position. Elvior TestCast has showed great potential and we are happy to offer this technology to our current and future clients. As TTCN-3 has been chosen by AUTOSAR as their official test language for conformance tests, Elvior TestCast will be of particular interest to companies in our core market, the automotive industry.", says Klaus Lambertz, CEO and co-founder of Verifysoft Technology.

About Elvior

Elvior is one of the leading TTCN-3 test tools providers in the world. Elvior's mission is to make embedded and distributed software testing efficient. Elvior provides user-friendly and intuitive test tools that save time and money in tests development and legacy tests maintenance.
